DETAILED ACTION

Page 2

Election/Restrictions

1. Applicant's election with traverse of Invention II in the reply filed on July 19, 2007 is acknowledged. The traversal is on the ground(s) that examination of all the pending claims can be made with no serious burden on the Examiner since the claims directed to Invention II have already being allowed, and four previous actions have already been issued on all the claims. This is not found persuasive because, as the applicant is surely aware, patents are limited to only one invention (emphasis added) while the instant claims are clearly directed to two different and distinct inventions (as detailed in sections 2-5 of the Office Action mailed June 19, 2007). In addition, while the applicant might be correct in that the claims directed to Invention II have already been allowed and, therefore, examination of such claims does not imposed a serious burden, it is also a fact that the claims directed to Invention I are not only still under discussion, but also have been amended to additional structural and functional limitations (i.e. the second sensor for measuring sample radiation) which would, indeed, require additional search and consideration beyond what was presented in previous Office Actions.

Since the instant claims are directed to two different and distinct inventions and examination of all the pending claims would be a serious burden on the Examiner, the requirement is still deemed proper and is therefore made FINAL.

Allowable Subject Matter

2. Claims 15-20, 22-37, 39-43, 64, 70, 78, 98, 104, 112 and 114-117 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Applicant teaches an illumination device having plurality of groups of light-emitting devices, at least one first group of light emitting devices being for emitting a first spectrum of light and a second group being for emitting a second spectrum different from the first one. A controller drives each group to produce a composite spectrum, such composite spectrum including wavelength only within a contiguous bandwidth of a predetermined target range when the controller supplies prescribed maximum amounts of power to all the groups of light emitting devices. In a second embodiment the composite spectrum simulates the spectrum of a predetermined light source. In a third embodiment, the plurality of light emitting devices includes at least two white light emitting diodes, such diodes having respectively different spectra. In a fourth embodiment, the controller is configured to vary the color temperature of the composite radiation within a range of approximately 2,300 degrees Kelvin and 4,500 degrees Kelvin.

Conclusion.

4. This application is in condition for allowance except for the presence of claims 1-14,44-63,66-69,71-77,79-97,100-103,105-111 and 113 directed to an invention non-elected with traverse in the reply filed on July 19, 2007. Applicant is given **ONE**MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue. The prosecution of this case is closed except for consideration of the above matter.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ismael Negron whose telephone number is (571) 272-2376. The examiner can normally be reached on Monday-Friday from 9:00 A.M. to 6:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jong-Suk (James) Lee, can be reached on (571) 272-7044. The facsimile machine number for the Art Group is (571) 273-8300.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications maybe obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For
